# Take Action! Urge the Frankfort Plant Board to DELAY the VOTE on the proposed power contract with KyMEA.

The FPB is considering signing a 10 year contract with KyMEA for coal power from Big Rivers Electric, which has the highest rate of carbon emissions of all utilities in the USA.[1] The vote is scheduled for Tuesday August 16 at their regular board meeting (5:00pm at Farmers Bank, 125 W. Main St., Frankfort).

# Message to FPB Board

We ask for a delay on the vote about the KyMEA power contract, to give the board and community time to fully evaluate the contract. Frankfort was offered a take-it-or-leave-it contract with no process for engaging with the consultants to offer input, consider options, and evaluate alternatives. This is a major decision for the community that should allow for greater community involvement.

Committing to a 10-year contract for coal involves major financial risks at this time of great change in the energy sector. The FPB should allow a few more weeks to evaluate the contract and ensure that we make a financially sound decision.

## **Key Questions**

- 1- What impact will the EPA's Mercury Rule have on our rates?
- 2- What impact will new water protection regulations (the "ELG" rule) have on our rates?[2]
- 3- How will coal ash disposal regulations impact our rates?
- 4- What impact could carbon regulation have on our rates?
- 5- Why should we lock into a 10 year contract, and not a 3 year contract that would give us more options in the future?
- 6- These questions and other concerns with this complicated contract merit time for dialogue, evaluation, and careful consideration of options.
- 7- If this vote is rushed through and becomes a financial disaster such as Paducah has experienced, responsibility will rest on the shoulders of those who voted for it.[3]
- 8- If we take the time to consider the proposal carefully, and come to agreement on how to move forward, then all will share responsibility for the results.

Please contact the FPB Board of Directors and ask them to DELAY THE VOTE on the KyMEA power contract.

Also contact your City Commissioners, County Magistrates, Mayor May, and Judge/Executive Wells to share your concerns.
